RAZOR®

Premium Performance & Quality

RAZOR Spray Guns deliver premium performance for base, clear and primer coats.

RAZOR gravity feed spray guns have a nickel-plated finish, 100% stainless steel fluid passages, stainless steel fluid needle and nozzle, 3M™ PPS™ Adapter and a 23-ounce polished aluminum cup.*

**The HVLP Primer has a blue anodized finish, stainless steel fluid needle and nozzle, and does not include a 3M™ PPS™ Adapter. Waterborne guns include one 23-ounce plastic cup.*

Gravity Feed Guns

HVLP

Popular for spraying base and clear. Delivers excellent finish quality, atomization and reliability.

- The lightest gun in its class – only 1.3 lbs
- Multiple nozzle sizes ranging from 1.2 to 1.5

HVLP Metallic

- Optimized for metallic paint
- Well-defined spray pattern for superior material distribution

HVLP Primer

- Low overspray to minimize sanding
- Blue anodized gun handle

LVLP

Sprays base and clear, but optimized for clear coats.

- Spray gun of choice when shop air is limited
- An excellent clear coat gun

Compliant

Sprays clear, base and primer coats with transfer efficiency equal to or better than HVLP. Delivers higher fluid flow for increased production speed.

Conventional

Finest finish quality. Lower transfer efficiency when compared to HVLP, LVLP and Compliant.

- Fast production rates
- Finest finish when HVLP is not required

Waterborne Guns

Use Razor Waterborne guns for spraying waterborne base coats. The fluid passages are corrosion resistant and the 23 ounce plastic cup is easy to clean, and recommended for use with waterborne paint.

HVLP Waterborne

- Optimized for waterborne paint
- Includes a 23-ounce plastic cup

Compliant Waterborne

- Optimized for waterborne paint
- Includes a 23-ounce plastic cup

Siphon Feed Guns

HVLP Siphon

- Extremely smooth spray pattern for superior finishes
- Atomizes a broad range of coatings

Compliant Siphon

- Tailored for base and clear coats, high solids and single stage coatings

Conventional Siphon

- Finest finish when HVLP is not required

Pressure Feed Guns

HVLP Pressure

- Extremely smooth spray pattern for superior finishes
- Atomizes a broad range of coatings

Compliant Pressure

- Tailored for base and clear coats, high solids and single stage coatings

Conventional Pressure

- Finest finish when HVLP is not required
